

# MINE AND PROSPECT; FURNACE AND MILL

## GRAND CENTRAL IS A MINE JUST NOW

Superintendent Donnelly Tells of the Conditions Since Recent Ore Bodies Were Uncovered.

"The Grand Central Mining company never had a mine prior to recent developments," said Patrick Donnelly, who has presided over it since its infancy, yesterday morning. "Hitherto it has had a place of one," he added.

For forty feet he has crossed-cut the latest development on the 800-foot level north, and yet no wall has been disclosed, while a sampling of the conglomeration forwarded to the smelter the previous day revealed an average of 40 ounces silver with \$39 gold and fractional values in copper, the lead occurring in bunches only. It was 260 feet north of the crossing on which the Buttery stop was developed, the new crossing or break was reached, and with it the ore body which is now responding so generously to the needs of the shareholders and which affords every assurance of greater strength than any in the history of the mine. More gratifying even than this, said superintendent Donnelly, is the assurance on the 1100-foot level 100 feet north of Buttery stop and in exact line with the strike of the ore bodies there. This body has increased with every shift and will no doubt rise to the plane of the famous stop with the dip of the north-break as distinguished from that which pitched to the south and upon which latter the "pinch" occurred. It is not a question now of what the mine is "capable" of putting out, said Mr. Donnelly; it is simply one of what it "will" put out.

Discussing Victoria, in which much local interest is manifested, Superintendent Donnelly said that work on that property, the control of which is exercised by those in control of the Grand Central, will probably be resumed before the expiration of sixty days, with much to indicate that it will be added to the roster of Tintic producers before the close of the year. Mr. Donnelly is again suffering acutely from rheumatism and will remain in Zion until such time as he has found relief, his latest achievements entitling him to an indefinite rest.

## MAMMOTH REAPPEARS IN THE OPEN MARKET

The first lot of ore from the properties of the Mammoth Mining company to appear in open market since its contract with the American Smelting and Refining company was abrogated was captured yesterday by the Bingham Con., and while the consignment carried a unit of ore of lead, it was not enough to disqualify it at a pyritic plant. The lot, consisting of 105 tons, contained about 6 per cent copper and 23 ounces silver with \$7.40 gold per ton, and will be followed by another which is now at the sampler. Of this class of ore the management reports a considerable volume in the mine, and with a good margin the output promises to increase steadily. In a sort of carload of gold-bearing ore is promised that ought to compare favorably with the \$35,000 record made by the Centennial Eureka during an early day, while the copper-bearing ores are reported in fine condition.

## MONTANA-TONOPAH TO MILL SOME ORE

The Midway mill completed its run on ore from the Golden lease Thursday, and yesterday or today commenced a run on ore from the Montana-Tonopah mine. Sixty tons of the mine's medium grade product will be put through in order to determine how close it can be worked, says the Tonopah Bonanza.

In the east end of the North Star, 150 feet from the 1000-foot north crosscut, two feet of high-grade ore has been struck, the slope between the 1000 and 600-foot levels is up forty feet and shows six feet of ore between the walls. Part of this is of shipping grade, the balance being of good milling quality.

## ASTONISHED AT THE ACTIVITY IN BINGHAM

While he was prepared to explore big ore bodies when he drew on his diggin' boots and boarded the train for Bingham on Tuesday morning, the wealth which has been blocked out and that is being hourly added to by the management of the United States company's Bingham system of mines was a revelation to him, said P. J. Donohue on his return from camp yesterday. Having gone there through the courtesy of the management, however, the well-known expert did not feel at liberty to exploit all he saw. Bingham throughout was a revelation to Mr. Donohue, and that the present tonnage from its mines will have been doubled before the expiration of the year he has no doubt. Mr. Donohue was most favorably impressed by the equipment with which the Utah copper company has provided itself, and with it has no doubt of the earning capacity of the porphyries. With this affording an outlet for those exhaustless deposits of

### THE ANT.

Facts About One of Nature's Most Industrious Creatures.

When spring comes with all its wealth of opening buds and new flowers, the ant is preparing for a season of profitable industry. It comes out of its winter quarters and locates a new home where it can store away, during the summer months, the sustenance for the long winter days. Just as industrious as the ant—but in a different way, are the countless infinitesimal germs which burrow into the scalp and eat away at the roots of the hair. As they burrow through the scalp, and if the germs are not all killed, baldness results. Newcomb's Herpicide is the only known remedy which kills the germs. Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich.

## DALEY-WEST WAS AGAIN DISORDERLY

The day on the mining exchange closed on the sale of 15,780 shares of stock, that brought \$14,478.35, and with Daley West again a most unruly subject, the market, under the weight of 250 shares, flattening out to \$30.92, although it made a slight rally and at the close recorded a transfer at \$31. Con. Mercu executed an order for a single thousand at 62 cents, while Yankee Con. recorded slowly to 50c spot, with the shorts placing it at 49. Tetro was less buoyant and sold down to 32, while La Reine, which passes into the hands of Jesse Knight on Monday, moved up to 6 cents in the trading, with Uncle Sam weak at 19. Richmond-Anaconda, of the same locality, rose, appeared on the bargain counter, while Lower Mammoth changed hands at 57 cents and Star Con. at 35. While the seller was moving Grand Central around \$35, the share was marked up to \$45 with \$1 bid for Daley West, and \$185 for Daley, without a suffix. Ajax responded to a bid of 5 cents, while May Day declined to 6 cents, with Marching outfit at 90 and the day closing on the following market:

### Boston Copper Market.

Special to The Tribune.  
BOSTON, Mass., March 16.—There was not much life in the copper share market today. The opening was strong and some prices held fairly well during the morning, but traders became somewhat disappointed at the non-appearance of a better demand for these shares and sold them during the afternoon. This brought about a reaction and the market closed with a loss of 1/2 cent. There was no special feature

## EX-SENATOR WOLCOTT VISITS OLD MEXICO

Special to The Tribune.  
CITY OF MEXICO, March 15.—Ex-Senator E. O. Wolcott of Colorado, who arrived here after an inspection of mining properties in which he is interested in the State of Chihuahua, declares that Mexico's mining development within the next few years will astonish the world. He said:  
"The natural resources of Mexico are marvelous. Her mines are destined to be sources of wealth and power. Many of her richest mines have been opened and worked in a desultory fashion for many years, but modern mining machinery is bringing their real treasures to light, and results within the next few years will astonish the world. The excellent administration of the laws and the protection given to persons and property are great inducements to investors and a great credit to the country. The fame of Mexico's government has spread throughout the world in recent years, and has demanded the admiration of all people. I have been in Mexico, and this country has been intensely gratifying, and I shall have some very complimentary things to say of Mexico and her government to my people at home."

## AFFAIRS OF MAJESTIC ENLIVENED BY STATEMENT

Locally the statement, with which the voting trust committee has abandoned all effort to finance the Majestic Mining company and to reclaim its Beaver county holdings, that are now overcome by an avalanche of claims, big, little and water-weight, is viewed as nothing less than a refined way of informing the shareholders that they must either get under the umbrella provided by the Monarch or resign themselves to the inevitable.  
The voting trust committee has, after personal investigation, simply verified what was said by Col. William A. Farish when the company was admonished that the resources of the property were not in condition to justify it in blowing in the smelter. How the shareholders who are to be pulled on the proposition to join with the Monarch in a few days will view it will not be known until that count has been taken. It has been the miner and other interests at Milford and Salt Lake are waiting on the result, as the moneys long due are needed by many of them.

## CON. MERCUR ON THE EASTERN MARKET

Replying to an inquiry from Middletown, O., the United States Investor of Boston says it has ascertained that at the Con. Mercu "the ore bodies are large, but the values are low. If the slimes process proves successful," it adds, "the increased saving on the present tonnage should be \$50 per day, or \$700 a month. If the tonnage is doubled, the net earnings would be \$1000. The company ought to be able to pay 2 cents a share per month if all goes well. With the present showing, it will be some time before the mine is renewed. As a speculation, the stock appears to be a purchase, if one is willing to be patient."  
As an "investment" the shares of the Con. Mercu at the present market are selling at a strong crowd daily at this time or the line, while the addition of another 100 tons daily to its output of ore should correspondingly increase the earnings of the next thirty days. Of the new ore body in Golden Gate ground, it is said that it is behaving very satisfactorily.

## The Road to Tonopah.

Telling of the progress of construction along the branch line of track between Tonopah and the Southern Pacific connection, the "Tonopah News" says: "During the week a mile and a half of track was laid and surfaced out of Rhodes, and today all the material for the construction of the branch line is on hand. On Monday track laying, aided by the construction train, will begin in earnest, the intention being to lay from a half-mile to a mile a day. Thirty-four miles of grading was reported completed up to last night, nine miles being credited to the Oddie & Overbury force. The latter will finish their contract in about three weeks. The McLean & McSweeney force and the Collins & Young forces are now working between Coles' and French's wells.  
"Material is arriving regularly at Rhodes, and last night work was received of the arrival of two flat cars at Hawthorne, making six now on hand."

Francis G. Luko, General Manager.  
"Some people don't like us."

## LA REINE'S DESTINY IN NEW HANDS

Control of Properties Is Acquired by Uncle Jesse Knight Who Will Manage Them.

Control of the La Reine, whose holdings are strewn along the strike of the trough that worms its way through Godiva hill, Tintic, yesterday passed into the hands of none other than Uncle Jesse Knight, the nestor of that productive region, and on Monday next the management will be formally transferred to him, said Harry Joseph, the present manager, during the day. It is the intention of the new master of the undertaking to give to it his undivided attention, and should he fail to place it under his first disappointment in that locality. That he is convinced of the ultimate productiveness of La Reine ground, yesterday's transaction affords the best evidence, and that he will succeed in demonstrating it many are prepared to believe. Perhaps no one knows any more, with only a few as much, of that particular portion of the La Reine which has been the subject of invasion of the zone was directed by a vision which gave him the Uncle Sam and Humbug mines, from which he derived over a million. Again, his knowledge of La Reine has probably been promoted by his knowledge of Salvador, which adjoins the former and from which latter he is now raising some ore of good quality. All events, much confidence is reposed in Mr. Knight as a miner, and the future of La Reine will be anticipated with much interest.  
Just what figures were required to locate the control manager Joseph would not divulge, nor would he admit that Mr. Knight would submit a proposition to consolidate his Salvador ground with that of La Reine.

## DENNY RYAN IN TOWN.

One of the Original Owners of the Great Horn Silver Mine.

"Denny" Ryan, one of the old guard to which mining in Utah is indebted for its present prominence as an industry, and who, as a partial reward, drew a fortune from the vaults of the old Horn Silver at Frisco, came in from Minnesota yesterday morning to visit with his brother Patrick, under whom the bonanza at Frisco was made to demonstrate its merits, and leaves for the East again today. It is nearly twenty years, said the visitor yesterday, since he has visited the Horn Silver mines, of which he was one of the few owners who took down \$500,000, without reference to the wealth that was divided by them while they were operating the bonanza, and while it has been productive of ore of the value of \$14,000,000, he sees many possibilities left. The prominence attained by Beaver county as a source of wealth is not surprising to Mr. Ryan. On the contrary, he is astonished, perhaps, that its merits were not recognized and its opportunities embraced at an earlier day by the expert miner, for no country reveals greater mineralization. With his brother and others, Mr. Ryan has invaded Mexico, where they have obtained mining properties that promise to gratify all future needs, if not their wants, although the same crowd retains valuable interests in Beaver county, where some active development is promised the present season. Mr. Ryan, who returns to Zion in excellent health, met with a most cordial reception from the cronies of an earlier day.

## April Fool and Iowa.

Active development has been inaugurated by S. W. Hall, representing those to whom the Bonanza properties were recently bonded, on the April Fool and Iowa mines on Markham hill, and will be continued steadily throughout the year. The intention of the management is to continue the tunnel started by the owners of the territory and to advance that to well-defined ledge.

## Will Settle in Goldfield.

Convinced of the ultimate prominence and permanency of Goldfield, Nev., Vivian P. Strange will leave for that camp today to settle into permanent moorings. With others, Mr. Strange, who has been identified with the mines of Utah for years, recently made an examination of the new camp and sees how, with development, it may make the most productive territory. At all events, he will take a chance.

## Mining Notes.

J. T. Brecken left for Stockton yesterday.  
The Hope mine at Tintic disposed of a lot of ore yesterday through A. B. Sawyer.  
Superintendent Allen of the United States has returned from its Bingham properties.

Ernest Hamberger, assistant manager of the Daley West, came down from camp again last night.

The H assessment on the Godiva of Tintic has been paid up, this giving the treasurer about \$400 on which to draw.  
It is understood that arrangements for the resumption of work at the Overland of Sunshine have about been completed.

Three carloads of second-class ore from the Carles of Tintic was delivered at the Bingham Con.'s furnaces during the day.  
Joseph Elger leaves for the gas and oil field today, to look over his company's territory, which has long been productive of gas.

The second half of the Grand Central's compressor will be installed at once when sinking below the 1100-foot level will be inaugurated.  
The payment by the Utah-Apex on the Highland Roy Con., which Mr. Ryan March 15th, has been made, said one of the beneficiaries yesterday.

John J. Daly, president and general manager of the Daley-Judge, has returned after an examination of the properties at Park City and with the behavior of which he is much pleased.

W. H. Wilson will leave for the properties of the Frederick Warde Mining company at Searchlight, Nev., on Saturday and promise to place them among the producers the present season.

The recent assessment on the Johnny of Stateline has been paid in, while the mines and mills are rapidly approaching a period when the reimbursement of those on whom the levy was made will begin.  
A letter from Dick Colburn, who is now among the prospective bonanza kings of Goldfield, Nev., assures Broker Tibbals that conditions at the Yindicher in that camp are all favorable to early production.

Tonopah Bonanza: Checks recently sent here by E. R. Holden and forwarded to New York for collection have been returned with the legend "no funds." Holden was the prime mover in the Tonopah Syndicate and Tonopah National companies, and was also the publisher of the Tonopah Herald, a semi-occasional jour-

nal, printed in New York. The return of the checks probably marks the passing of the Holden companies.  
J. L. Record, president of the Minneapolis Steel and Machinery company is the guest of Mr. Pope, the company's resident representative. Much of the structural material for the big plants of this State have come from the house of Mr. Record.

J. J. Treman has returned from the Beaver Con.'s prospects in Beaver county. R. A. Marx, at one time identified with the Golden Gate at Mercur, and who left there to join the forces of the Republic mines in Washington, is down from the north, with Goldfield, Nev., his destination.
